

Olney Pediatrics

Patient Portal and Use of Electronic Communications (Minors)

PLEASE RETURN COMPLETED AND SIGNED

Portal Consent Form

To better serve our patients, our office has established a Patient Portal, for some forms of communication. The Patient Portal is a simple way to access your child's health information online. In addition, the Patient Portal allows you to:

- View upcoming appointments
- View and print immunization records for school and day care
- Request prescription refills
- Retrieve test/lab results
- View balances
- Make secure credit card payments for balances
- Communicate with our office by sending and receiving secure messages regarding lab results, medical questions, medication refill requests, referral requests.

For routine matters that do not require immediate response, we ask that you contact our office through the Patient Portal. Please remember however, that this form of communication is not appropriate for use in an emergency. Should you require urgent or immediate attention, please contact our office directly.

Email address for Patient Portal: _____ Owner Name _____

Email address for Patient Portal: _____ Owner Name _____

Patient Consent for Use of Electronic Communications

In addition to the Patient Portal, our office also has the ability to confirm upcoming appointments electronically. We can send to **one** location, a text message, automated voice mail message, or email. Please let us know how you would like to receive your reminder and for which children this means of electronic reminder applies (only those **under** 18 years old).

The practice does not charge for this service, but standard text messaging rates may apply as provided in your wireless plan (contact your carrier for pricing plans and details).

Reminder method (Choose only 1 of the following.....)

_____ I prefer text message reminders at this number: _____

_____ I prefer voice mail messages at this number: _____

_____ I prefer email reminders at this email address: _____

CHADIS

We have started using a new program called CHADIS – Child Health And Development Interactive System. Using CHADIS will improve the communication between you and your child's doctor by providing us with vital information before you come in for your scheduled appointment. You will also be able to note concerns or questions that you may have. The CHADIS questionnaires will appear in the Patient Portal approx. 7 days prior to the appointment.

Please list all children that this is in effect for (**under 18 years old**)
